Stats

A useful set of three parts which are building bricks for offworld landing pads and roads. Nice finishing touch for [Extrplanetary Launchpads](#) bases. Good for those who want to have the neat look of our KSC parking area even away from home.

Works best when placed on flat area or welded with [UbioZur Welding](#).

- Easy to assemble in the field with [KIS](#). Tiles can be attached to the surface.
- Luminescent stripes glow in the dark.
- Can be buit whole via Extrplanetary Launchpads.
- Archive contains an "Extras" folder with already welded examples (welded parts are independent from the UbioZur Welding mod).

Various pattern examples
